FOREWORD

This is one of the series of Eco-labelling Criteria documents developed by SIRIM Berhad to support implementation of labelling for environmentally preferred products in Malaysia. It is noted that a need for environmental labelling service has been identified by Malaysian Industry to respond to request from both domestic and foreign purchasers. The **Eco-labelling Criteria for Fluorescent Lamp** contained in this document has been established by scientists from the Environmental Technology Research Centre within the Research & Technology Division of SIRIM in consultation with industry and other stake holders. Globally established concepts for labelling and international standards have been taken into consideration in developing the criteria. Evaluation methodologies selected in the criteria document are generally adopted from international or other recognized standards. A full listing of the references is included in the text of the criteria.

This criteria document was reviewed and recommended for adoption as an interim document by a Pro Tem Committee Members established by SIRIM Berhad. The criteria established will be subject to periodic review to reflect changing needs and conditions. Users and other interested parties may submit comment on the contents of this document for incorporation into future versions.

Pro Tem Committee:

Chairman

Mr Zaini Abdul Wahab, Demand Side Management, Energy Commission

Technical Author

Ms Siti Aishah Asmah Yusob, Environmental Technology Research Centre, SIRIM Berhad

Members:

Dr. Chen Sau Soon, Environmental Technology Research Centre, SIRIM Berhad
